

# The Packaging Systems Provider

Leading manufacturer of **premium packaging systems** and **automation equipment** for fresh-cut produce and seafood. We combine extensive knowledge in polymer science and processing with an ongoing commitment to research and development to improve quality and innovation in food safety and shelf life extension.

## Packaging Science

### Packaging solutions:

- Absorbent trays
- Pads
- Pouches
- Mini-containers
- Lidding film

## Equipment & Processing Expertise

### Automation Equipment:

- Semi-automatic and automatic slicers
- Tray sealers

## Product & Service Quality

### Benefits:

- Extend shelf life
- Improve quality
- Reduced cost
- Superior yield

## End-to-end food science systems for enhanced food safety

### SEAWELL™ Protective Packaging Systems

Patent pending technology that protects and preserves high value seafood products.

### FreshWell™ Absorbent Packaging Systems

Absorbent packaging systems separating products from their fluids to extend shelf-life and enhance freshness.

### Custom Lidding Film Solutions

Lidding material to extend shelf life while enhancing the freshness, quality, and integrity of each product.

### Processing Equipment

Semi and fully automated slicers, tray sealers, and pouch fillers. The equipment fully integrates with our absorbent food packaging and cuts costs while improving yields.
