

FreshWell™ Absorbent Mini Container Systems

FreshWell™ absorbent packaging systems improve freshness and extends the shelf-life of fresh-cut products for up to 10 days. The technology absorbs excess fluid from products via the absorbent pad sealed to the bottom of each mini container. Absorbent technology is safe for human consumption as it's a blend of food safe materials that comply with FDA and EU food contact regulations.

Benefits

- Removal of excess fluid results in the dramatic improvement in shelf-life, product quality, and product integrity
- Extended shelf-life increases sales and supply chain efficiencies while decreasing product waste
- The technology also significantly reduces dripping and spilling of excess product juices, which is a common customer complaint
- Ideal for school/university cafeteria programs
- On-the-go packaging ideal for convenience and grocery stores
- Tamper evident — peelable lidding film
- Fun to eat — no dripping

Products

- FPMC 2.5, 2.5 oz. Container, shelf-life, over 10 days
- FPMC 4, 4 oz. Container, shelf-life, over 10 days
- FPMC 6, 6 oz. Container, shelf-life, over 10 days

Highly absorbent food safe pad is sealed to the bottom of the container
