

FEATURES

- 90% recyclable, fiber-based system; uses only 10% removable plastic for easy recycling
- Plastic liner protects paper for hot or cold-filled liquid
- Top-seal ready for food safe storage or freezing pre- or post-baking
- Oven, microwave, and air-fryer-friendly containers to bake directly in package
- Wide variety of shapes and sizes to suit needs
- Customized 360° printing to brand with school logo, provide reheating instructions, etc.

BENEFITS

- Use up to 90% less plastic than conventional plastic-based solutions
- Prepare, store, or serve food directly in package, including baked goods (pictured)*
- Easily repurpose leftover food from large serving tubs; reduce overall food waste
- Support after school and summer meal programs with ready-to-eat, reheatable meals
